## Plant

- **Hydroponics.**  
First, we need to let seeds germinate, then, settle a rooted plant on this Fish Jar.
- At the moment that the Plant Root absorbs nutrients, the water in the Fish Jar is purified.

- All of these bring a better living environment for fishes.

## Pot Root Shape Tube

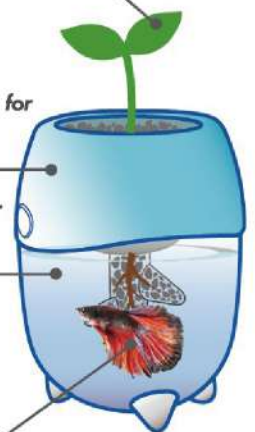

- Put Expanded Clay into the Root Shape Tube.

## Fish Jar

- Add water in the Fish Jar for both fish and plant's living.
- Please clean the fish jar and change water regularly.

## Fish

- The Microbes in the water will breakdown excrement into the fertilizer which the plant needs.
